

Introduction

This notice is to introduce the new TC12 re-usable IP-2(1) Full Height ISO Container. The TC12 (DN2044) design has been re-launched with new restraint systems, which are designed to facilitate the restraint of a wider range of packages or items for waste treatment or disposal services.

Key Changes to the TC12 Package Design

The TC12 design has been modified to maintain its IP-2 rating, and facilitates the restraint of 30 – 200 litre (UN approved) rigid wall packages and a range of (UN approved) flexible wall packages (waste bags) primarily for the transport of supercompactable or combustible wastes. The IP-1 rating is maintained when restraining other receptacles or wrapped items using any of the TC12 restraint system options, including a new restraint option to the base (please refer to the TC12 Packaging and Handling Instructions for further information).

The fleet is currently undergoing refurbishment and the first four units have just been re-introduced back into service, noticeable by a change in the external colour to grey. Please contact the LLWR Logistics Department for price and availability.

Associated Documentation

The new TC12 (DN2044) is launched with a complete new set of documentation;

- TC12 Package Approval Certificate
- TC12 Damage Assessment Form
- TC12 Data Sheet
- TC12 Package and Handling Instruction
- TC12 Maintenance Specification (Note - This will not available at the LLWR website as all scheduled maintenance will be performed by LLWR).

All TC12 documentation is available at: www.llwrsite.com/customerportal-packaging

Please circulate this information to all relevant personnel within your organisation
