

Introduction

This notice is to advise Customers of the amendments that have been made to the Waste Forecasting Form (WSC-FOR-WFO) and to remind Customers of the WFO submission dates.

Waste Forecasting Process

As part of the Waste Acceptance Procedure embodied in the Waste Services Contract, Customers are required to provide an updated Waste Forecasting Form once every 6 months as a minimum.

We would like to remind Customers that the next forecasting period begins on the 1st April 2014. Please ensure WFO Forms are submitted to LLWR no later than the 28th February 2014.

The WFO Form provides LLWR and its framework suppliers with a forecast of their waste treatment and disposal volumes, radioactivity and waste packaging requirements over the forthcoming 5 year period. For LLW disposal, this information also enables LLWR to allocate radioactivity and volume capacities to each Customer.

Amendments to the Waste Forecasting Form

Below is a brief list of updates that have been made to the WFO Form;

- Inclusion of period end dates for the 2014 and 2015 calendar years
- Footnotes reworded to improve general guidance on form completion

The updated WFO Form (version 3.5), is now available from our website at <http://llwrsite.com/customer-portal/waste-acceptance-procedure/>

The Waste Actuals Form (ref: NWPF04) has been subject to the same amendments and will be made available for Period 1 reporting in April 2014.

Further Information and Questions

If you require any further information or have any queries relating to this Customer Notice, please contact Fiona Robinson 019467 70309 or email: fiona.robinson@llwrsite.com
