

Introduction

This notice to inform Customers of the amendments to Waste Characterisation Form (WCH) and Waste Consignment Information Form (WCI) for LLW Disposal and Supercompaction.

Reason for Amendments

Further consideration has been given to Customer comments and implementation requirements since the WCH and WCI were published in December 2013. LLWR appreciate any changes to forms can be frustrating, but have concluded that the benefits of publishing the documents at this point outweighed the detriments. We will endeavour to minimise the number of changes going forward, but cannot rule them out until the transition to implement the 2011 Environmental Safety Case (ESC) at LLWR is complete. We see these are incremental changes rather than major, radical changes and they are described below.

WCH Amendments

The only change to the content and layout of the WCH is:

- An additional section entitled "Proposed Waste Routing" has been added to the waste information tab; and
- The requirements relating to packaging have been removed from waste conditioning and wastestream totals tabs.

Entries into the radiological fingerprint can be colour coded to indicate whether the value is based on measurement / analysis or has been discounted, or is present, but in low abundance.

A large amount of data validation has been added to the WCH data fields to ensure the data will transfer into a new software application LLWR will be using to manage these documents in the future.

LLWR will continue to accept version the current WCH until 31st March 2014; thereafter submissions of the form must be on version 3.3.

WCI Amendments

Changes have been made to enable text wrapping and data validation. No changes have been made to the content and layout of the WCI.

LLWR will continue to accept the current WCI for consignments of waste being shipped for disposal and/or supercompaction until 28th March 2014; thereafter submissions of this form must be on version 3.3.

The latest versions of the forms are available at www.llwrsite.com/customer-portal/waste-acceptance-procedure. If you are preparing documents in the versions published in December, please contact us and we will help make the transition to the latest document as painless as possible.

Further Information and Questions

If you require any further information or have any queries relating to this Customer Notice, please send an e-mail to: andy.k.bicknell@llwrsite.com or call: Andy Bicknell on 019467 70291.
