

Introduction

This notice is to highlight an amendment to the Waste Consignment Variation (WCV) process which will scale each WCV based upon the intricacy of the request, providing customers with a likely response time to their proposed variation.

Scaling Waste Consignment Variations

As a result of customer feedback the response time post submitting a variation is not meeting customer expectations. Customers have specified that they require a definitive date when they can expect an answer to the acceptability of their variation request. Given the varying complexity of variations submitted one time scale is not appropriate.

It has been decided that on receipt an initial scaling will be allocated to each variation based on previous experience of similar variations. Scaling details can be found in the table below:

Table 1 Reviewed variation and proposed timescales

Scaling	Description of Scaling	Proposed Timescale
1	Routine request that usually poses no problem and can be assumed to be custom and practice.	15 Working Days
2	Additional work from contractors or suppliers may be needed. This would usually involve additional justification in the form of either documentation, evidence or extra analysis work	70 Working days
3	Fundamental challenges to either the environmental, criticality (in the form of PMP and personnel memos required) or operational safety cases	120 Working Days

The Waste Acceptance Team will notify customers if the variation is re-scaled during the assessment process.

Further Information and Questions

If you require any further information or have any queries relating to this Customer Notice, please send an e-mail to: michael.gracey@llwrsite.com or call Michael Gracey on 019467 70290.
