

**Introduction**

This notice is intended to provide customers with an update on the Supply of (2910) TC01 (Half Height IP-2 ISO), (2989) TC03 (Third Height IP-2 ISO) and (2968) TC06 (Two Third Height IP-2 ISO) Package Designs.

**TC01 (2910) (Half Height ISO) Supply – Customer Forecasting**

Please follow either the WFO forecasting process for TC01 Supply or alternatively submit an enquiry through the LLWR Logistics demand process quoting your annual TC01 requirement for the next financial year, to ensure we manufacture sufficient stock. If neither process is followed and enquiries are submitted ad hoc, we cannot guarantee TC01 supply within required timescales, and long lead times may apply.

Customer WFO forms and supporting documentation are available on the LLWR website in the following location;

<http://llwrsite.com/customer-portal/waste-acceptance-procedure/>

**TC03 (2989) (Third Height ISO) Supply – Future Customer Demand**

LLWR seek future customer demand intelligence for the TC03 Package design, both short term and long term. If there is no long term demand for the TC03 package design, the decision will be taken to remove the TC03 package design from the fleet and no further units will be manufactured. If there is customer demand, LLWR has a scheduled design review approaching for the TC03 and it is expected that the design of the lid will be modified to eliminate the need for the Overlid. Please inform Logistics of your organisation's appetite for the TC03 Package.

**No response will be deemed as the TC03 Package not being required by your organisation in the short or long term.**

**TC06 (2968) (Two Third Height ISO) – Future Customer Demand**

The TC06 Package design has been subjected to a suite of re-assurance tests and has successfully passed all. LLWR seek customer demand for the TC06 Package, both short term and long term. The license re-issue timescales and re-commencement of manufacture will be subject to customer demand and timescales. Please inform Logistics of your organisation's requirements for the TC06 Package.

**Further Information and Questions**

If you would like any further information or have any questions regarding this issue then please do get in touch with our Transport and Logistics Team by e-mail: [transportandlogistics@llwrsite.com](mailto:transportandlogistics@llwrsite.com) or by phone: 019467 70301.
