

# August 2017 Waste Metric Dashboard

Period 5 : 30th July to 26th August FY 17/18

## UK Waste Diversion

The National Waste Programme aims to communicate progress in the implementation of the Waste Hierarchy and the Nuclear Industry Strategy for Low Level Waste Management across the UK. This dashboard shows key metrics that demonstrate the successful diversion of waste away from direct disposal and the optimal use of key national assets, such as LLWR and waste treatment facilities on sites around the UK, typically based on delivery of Joint Waste Management Plans (JWMPs). The objective is to encourage transparency and communicate progress to all stakeholders.

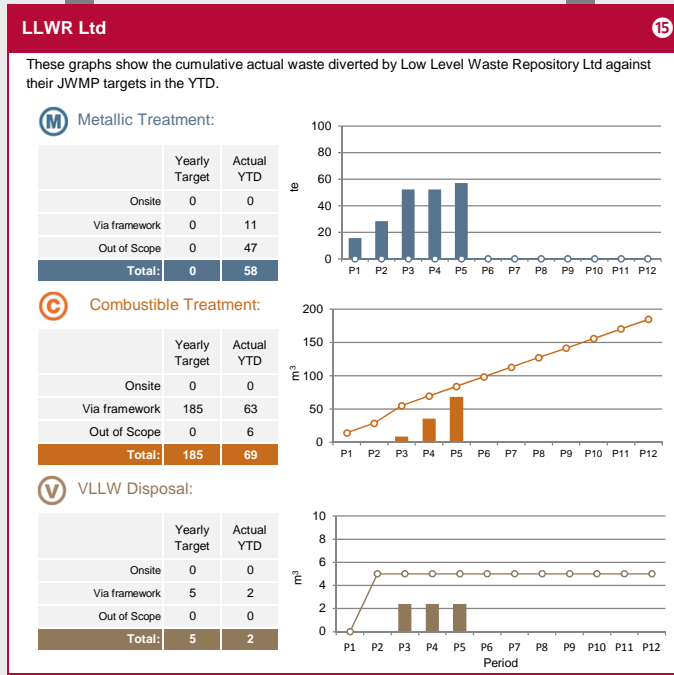

### Non-NDA Sites (YTD)\*\*\*\*

This table shows the cumulative actual waste diverted\*\*\* by non-NDA sites in the YTD

Non-NDA Site(s)	M (te)	C (m <sup>3</sup> )	V (m <sup>3</sup> )
Cyclife <sup>(1)</sup>	0	0	0
AWE Aldermaston	60	0	110
EDF Energy	0	0	0
Urenco UK	0	0	32
Tradebe Inutec Ltd	0	0	60
Capenhurst Nuclear Services	3	153	2523
Unitech	0	0	0
Others	0	6	389

The values above are inclusive of material diverted through direct contracts:  
0 te Metallic, 153 m<sup>3</sup> Combustible, 0 m<sup>3</sup> VLLW

### ILW → LLW Re-Classification

This table shows the actual volume of waste re-classified from ILW to LLW in the YTD.

SLC	Actual Volume Re-Classified YTD (m <sup>3</sup> )
Magnox Ltd	-
Sellafield Ltd	-
LLWR Ltd	-
Downreay	-
Non-NDA estate	-
<b>Total</b>	<b>0</b>

Key: ■ Cumulative Actual Waste diverted, —○— Target / Forecast

<sup>1</sup> Actuals/Target YTD only applies to VLLW via the framework

**Transport and Packaging**

**Utilisation of Transport Fleet**

This graph gives the relative percentage for empty miles (miles transporting empty containers) and utilised miles (miles transporting containers holding waste). A high utilisation % shows transport assets being used effectively.

**Package Re-use**

This graph shows, of the total number of containers transported, the percentage of packages that were a re-used container. A high re-use % shows transport assets being used effectively.

**Road vs. Rail Transports**

This graph shows of the total number of containers transported, which were by rail and which were by road. This includes rail shipments from Sellafield to LLWR.

**Cost Norms**

The three graphs below show the cost norms with the actual price per contract for comparison.

**LLW Disposals and LLWR Vault Capacity**

**LLW Disposals**

This table gives the number of LLW containers disposed of as LLW in the YTD.

Site(s)	No. of Containers sent for LLWR Disposal in the YTD												Total
	Period 1	Period 2	Period 3	Period 4	Period 5	Period 6	Period 7	Period 8	Period 9	Period 10	Period 11	Period 12	
<b>NDA</b>													
Sellafield Ltd	0	10	6	3	9								28
Magnox Ltd	0	0	0	1	0								1
LLWR Ltd	0	0	0	0	0								0
Cyclife	0	0	0	0	0								0
AWE Aldermaston	0	0	0	0	0								0
EDF Energy	0	0	0	0	0								0
Urenco UK	0	0	0	0	0								0
Tradebe Inutec Ltd	0	0	0	0	0								0
Capenhurst Nuclear Services	0	0	0	0	2								2
Unitech	0	0	0	0	0								0
Others	0	0	0	0	0								0
<b>TOTAL</b>	0	10	6	4	11	0	0	0	0	0	0	0	31
<b>Non-NDA</b>													
<b>Dounreay Vaults</b>													
Dounreay - Main Vault	0	0	16	0	0								16
Dounreay - Demolition Vault	0	0	0	0	0								0

**Total Impact of Diversions on LLWR Site**

This graph compares the actual site capacity used, against the planned capacity according to Life Time Plan (LTP) 08, and the capacity that would have been used if no treatment options were utilised. Actual disposals are based on the number of containers received by LLWR per year. To convert between raw volume and container number it has been assumed that one container takes up 22.8m<sup>3</sup> of vault space. For metallic wastes it has been assumed that 10te is contained within a HHISO. This graph starts in April 2010 when the new LLWR waste services contract was introduced. Up to this point 266,180m<sup>3</sup> of waste had been consigned to LLWR for disposal. For the purpose of this graph these values assume no secondary waste is received by LLWR from treatment providers.

Total volume saved by diversions: **164,874 m<sup>3</sup>**      Total no. of equivalent HHISO containers saved by diversion: **7,231**

**Usage of Waste Routes**

**Route Status**

This table shows the routes available to each of the sites, which have been utilised and which are yet to be utilised. This date is reflective of waste route usage from 2008 to the YTD.

**Dashboard Commentary:**

**Notes:**  
 \* JWMP targets have been revised in P1 to reflect version 12 submissions  
 \*\* Diversion totals from Non NDA include framework and non framework consignments.  
 \*\*\* Metallic Waste (te) to (m3) Conversion: 1.00 te/m3 (assuming 10te per HHISO)  
 \*\*\*\* For Non NDA sites, "zero" diversion may either reflect no diversion or diversion via direct contracts or self-performance which is not reported to LLWR at this time
