

Introduction

This notice is to inform customers of our intent to improve the method by which characterisation information is managed for waste streams that will not be disposed of either directly or indirectly at the LLWR. This follows on from Customer Notice LLWR-CN-2015-25. LLWR propose to introduce a new streamlined Characterisation Form for wastes that do not at any stage (before/after treatment or conditioning) require disposal at the LLWR. This will be known as the 'Non-LLWR Disposal Waste Characterisation Information Form (WCHIF).

Implementation Process

LLWR have spent the last few months developing the WCHIF through consultation with internal and external stakeholders. LLWR ask that customers review the proposed form and consider the impacts of the changes on their processes and systems by 4th April 2016 and notify LLWR via the customerteam@llwrsite.com email address with any issues. The WCHIF is available for review at: <http://llwrsite.com/customer-portal/customer-consultation/>

Once this external review has been completed, the WCHIF will be amended as required and will go through LLWR's internal governance arrangements to enable the form to be utilised by consignors by the end of April 2016. A contract amendment will also be issued to include the WCHIF to Schedule 5 (Waste Acceptance Procedure) of the Waste Service Contract

Further Information and Questions

If you require any further information or have any queries relating to this Customer Notice, please send an e-mail to: customerteam@llwrsite.com or call: Michael Gracey on 019467 70290
