

Introduction

This notice is to inform customers that guidance on how to manage complexants in waste is now available.

Guidance on WAC requirements for complexants

In September 2013, LLW Repository Ltd applied to the Environment Agency for a variation to its Environmental Permit. This permit came into effect in November 2015, and removed the long-standing prohibition on the acceptance of complexants in waste. The revised permit requires that LLW Repository Ltd manages waste, including complexants in waste, in accordance with the Environmental Safety Case (ESC), which it does via the Waste Acceptance Criteria (WAC). To do this, LLW Repository Ltd requested that customers provide information regarding complexants in waste, using Waste Characterisation Forms (WCH), and per consignment using Waste Consignment Information Forms (WCI). It is recognised that information on complexants is often fragmentary or difficult to obtain. Therefore we have produced a guidance note to assist customers in providing the necessary levels of information on complexants to enable disposal at the LLWR.

How to access guidance

The Guidance Note can be found on the LLWR website under the Waste Services, Our Services, [Low Level](#) section.

Further Information and Questions

If you require any further information or have any queries relating to this Customer Notice, please send an e-mail to: michael.gracey@llwrsite.com or call: Michael Gracey on 019467 70290.

Distribution List

We have issued this Notice to the following people from your Company's Contact Details Form (Reference: WSC-FOR-CON):

- All nominated representatives

If you need to update these details, please submit a revised Form: <http://llwrsite.com/waste-services/new-customers>.
