

Introduction

This notice is to inform customers that a new high level guidance document has been produced as a reference guide to support audit and assurance activities conducted by LLWR.

Guidance for the Management of Lower Active Waste (LAW)

This document is primarily intended for use as a useful reference guide to support audit and assurance activities conducted at external facilities by LLWR personnel. It is also available to customers, suppliers and regulators to initiate and facilitate further cross industry discussion to help raise standards for the management of lower active waste in an effort to reduce risks, in particular that of waste mis-consignment.

This guidance is a live document that will be reviewed on a regular basis with involvement from all relevant stakeholders to incorporate learning from past experience, advances in techniques and technology, and any other constructive feedback. Our long-term goal is to have a single document that both industry and the regulators all use on a regular basis for the management of LAW.

The Guidance for the Management of Low Active Waste (LAW) can be found here:
