

# September 2016 Waste Metric Dashboard

Period 6 : 28th August to 1st October FY 16/17

## UK Waste Diversion

The National Waste Programme aims to communicate progress in the implementation of the Waste Hierarchy and the Nuclear Industry Strategy for Low Level Waste Management across the UK. This dashboard shows key metrics that demonstrate the successful diversion of waste away from direct disposal and the optimal use of key national assets, such as LLWR and waste treatment facilities on sites around the UK, typically based on delivery of Joint Waste Management Plans (JWMPs). The objective is to encourage transparency and communicate progress to all stakeholders.

### NDA Site Summary YTD

These graphs are a summary of the cumulative progress to date against the combined JWMP targets \*\*. These numbers do not capture VLLW disposed of on site.

### Transport and Packaging

#### Utilisation of Transport Fleet

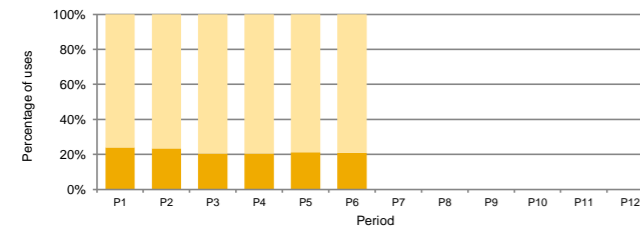

This graph gives the relative percentage for empty miles (miles transporting empty containers) and utilised miles (miles transporting containers holding waste). A high utilisation % shows transport assets being used effectively.

Legend: Empty Journeys (Yellow), Utilised Journeys (Orange)

#### Package Re-use

This graph shows, of the total number of containers transported, the percentage of packages that were a re-used container. A high re-use % shows transport assets being used effectively.

Legend: Single / first use container (Yellow), Re-used container (Orange)

#### Road vs. Rail Transports

This graph shows the total number of containers transported, which were by rail and which were by road. This includes rail shipments from Sellfield to LLWR.

Legend: Road containers (Yellow), Rail containers (Orange)

### LLW Disposals and LLWR Vault Capacity

#### LLW Disposals

This table gives the number of LLW containers disposed of as LLW in the YTD.

#### Total Impact of Diversions on LLWR Site

This graph compares the actual site capacity used, against the planned capacity according to Life Time Plan (LTP) 08, and the capacity that would have been used if no treatment options were utilised. Actual disposals are based on the number of containers received by LLWR per year. To convert between raw volume and container number it has been assumed that one container takes up 22.8m<sup>3</sup> of vault space. For metallic wastes it has been assumed that 10te is contained within a HHISO. This graph starts in April 2010 when the new LLWR waste services contract was introduced. Up to this point 266,180m<sup>3</sup> of waste had been consigned to LLWR for disposal. For the purpose of this graph these values assume no secondary waste is received by LLWR from treatment providers.

Total volume saved by diversions: **139,272 m<sup>3</sup>**      Total no. of equivalent HHISO containers saved by diversion: **6,108**

### Usage of Waste Routes

#### Route Status

This table shows the routes available to each of the sites, which have been utilised and which are yet to be utilised. This date is reflective of waste route usage from 2008 to the YTD.

### Cost Norms

The three graphs below show the cost norms with the actual price per contract for comparison.

#### Dashboard Commentary:

- May 2016 changes:
  - added ILW to LLW re-categorisation metric
  - Moved Notes to page 2
  - Removed Milestones section (these are reported elsewhere)
  - Expanded LLW disposals at Dounreay to include the Dounreay demolition vault.
- (1) Cyclife is the new name for the Metals Recycling Facility at Lillyhall, which was previously owned by Studsvik

#### Notes:

- \* The SL Metallic forecast includes 8.10te of metal forecast for diversion through direct contracts
- \*\* JWMP targets have been revised in P6 to reflect version 11 submissions
- \*\*\* Diversion totals from Non NDA include framework and non framework consignments.
- \*\*\*\* Metallic Waste (te) to (m3) Conversion: 1.00 te/m3 (assuming 10te per HHISO)
- \*\*\*\*\* For Non NDA sites, "zero" diversion may either reflect no diversion or diversion via direct contracts or self-performance which is not reported to LLWR at this time
