

Introduction

This notice is to inform Customers that LLW Repository Ltd is reviewing the future for supply of the (2989) TC03 (Third Height IP-2 ISO) Package.

TC03 (2989) (Third Height ISO) Supply – Demand

The demand for the TC03 (Third Height IP-2 ISO) has decreased to single figure orders over the last three years and a review is being undertaken to determine the future demand of this package. It has been decided that if there is no long term demand for the package, the package shall be phased out. (The package design will be frozen, the manufacturing pack will be archived and no further units will be manufactured). The TC03 IP-2 licensing will be continued, covering serial numbers of existing units only. The Data Sheet for the package dimensions and capacities is provided on the LLWR Website.

Customers are asked to assess their potential future requirements for use of the TC03 package and to communicate that requirement to LLWR before the 31st January 2017. If Customer assessment indicates that the package demand is sufficiently high and orders are placed for the new packages, LLWR will carry out a design review negating the need for an overlid.

If you do not respond to this notice by 31st January 2017 we assume your organisation no longer requires the TC03 package.

Further Information and Questions

If you require any further information regarding licence requirements or have any queries relating to this Customer Notice, please send an e-mail to: transportandlogistics@llwrsite.com or call 019467 70301
