

Introduction

This notice is to remind Customers to submit a Waste Forecast Form (WFO) to LLWR by no later than the 15th September 2017.

The next Waste Forecasting period begins on 1st October 2017. Customers should complete version 3.10 of the Waste Forecasting Form which is available on the LLWR Website.

As this is a mid-year update, only periods 6-12 need to be populated, LLWR will populate the first 6 months

Waste Forecasting Process

As part of the Waste Acceptance Procedure embodied in the Waste Services Contract, Customers are required to provide an updated WFO submission once every 6 months as a minimum.

The WFO Form provides LLWR and its framework suppliers with a forecast of the waste treatment and disposal volumes and waste packaging requirements over the forthcoming 5 year period.

Data should be entered from October 2017 onwards. Periods 1-6 will be completed by LLWR with the reported waste metrics.

Transport and Packaging

The Transport and Packaging section of the WFO form is used by LLWR to predict forthcoming container requirements. Providing the required information also enables the mitigation of package manufacturing delays and reduces any associated storage costs.

Further Information and Questions

If you require any further information or have any general queries relating to this Customer Notice, please contact Fiona Robinson 019467 70309 or send an e-mail to: inventory@llwrsite.com
