

Introduction

This notice is to remind Customers to submit a Waste Forecast Form (WFO) to LLWR by no later than the 28th February 2018.

The next Waste Forecasting period begins on 1st April 2018. Customers should complete version 3.10 of the Waste Forecasting Form which is available on the LLWR Website.

Waste Forecasting Process

As part of the Waste Acceptance Procedure embodied in the Waste Services Contract, Customers are required to provide an updated WFO submission once every 6 months as a minimum.

The WFO Form provides LLWR and its framework suppliers with a forecast of the waste treatment and disposal volumes and waste packaging requirements over the forthcoming 5 year period.

Transport and Packaging

The Transport and Packaging section of the WFO form is used by LLWR to predict forthcoming container requirements. The information also enables the mitigation of package manufacturing delays and reduces any associated storage costs.

Further Information and Questions

If you require any further information or have any general queries relating to this Customer Notice, please contact Mark Beard 019467 22738 or send an e-mail to: inventory@llwrsite.com
